### **TO OPEN YOUR GARAGE DOOR IN CASE OF POWER FAILURE**

1. Go into your garage through the side door
2. Pull the release cord down
3. Slightly open the garage door by hand (approx. 4"/10cm) and **press the green button** next to the cord so that the release springs back in
4. Open the garage door manually and take your car out
5. Close the door completely (manually)

*When the power returns, press the button on your handset to return to automatic operation*
